

# ANTI POLLUTION MIST

Urban hair protection

We are now well aware of the effects of pollution on our skin, so **why shouldn't we think it is the same for hair?**

This product blends a **good protection, preventing the adhesion of pollution particles to the hair**, with the concept of a **on-the-go beauty product**, to be applied whenever needed to protect hair: after gym, at work, before going out... **The mist format** makes it suitable to be used more times a day in a **quick and practical way!**

It has as well a **strong anti-oxidant activity** that, similarly to skin, is fundamental against premature aging of hair and to preserve hair beauty for a longer time.

## Anti pollution mist

LSIN9369

Ingredients	Phase	%	Function
Aqua	A	To 100	Solvent
Hydroxyacetophenone		0.50	Preservative
Trisodium Ethylenediamine Disuccinate		0.20	Chelating
NANOCREAM (Potassium Lauroyl Wheat Amino Acids, Palm Glycerides, Capryloyl Glycine)	B	5.00	Active
