

# EWO FOUNDATION

W/O foundation to achieve a perfect coverage on skin without leaving greasy or sticky sensation. The texture given by **Ewocream** is **rich and creamy**, but immediately after application skin is left with a feeling of **silky dry**.

Ingredients	Phase	%
<b>Ewocream (Polyglyceryl-3 Sorbityl Linseedate)</b>	A	5.00
Hydrogenated Polydecene (and) Disteardimonium Hectorite (and) Propylene Carbonate		4.00
Cera Alba		1.00
Isododecane and Hydrogenated Polydecene		10.00
C13-15 Alkane		5.00
Ethylhexyl Palmitate		6.00
Caprylic/Capric Triglyceride		2.00
Zinc Stearate		0.60
Aqua	B	54.45
Glycerin		0.50
Magnesium Sulfate		0.80
Phenoxyethanol (and) Ethylhexylglycerin		1.00
Titanium Dioxide (CI77891), Aluminum Hydroxide, Triethoxycaprylylsilane	C	8.00
Iron Oxides (CI77492), Triethoxycaprylylsilane		1.00
Iron Oxides (CI77491), Triethoxycaprylylsilane		0.50
Iron Oxides (CI77499), Triethoxycaprylylsilane		0.15

## CHARACTERISTICS

Aspect:	Creamy emulsion
Color:	Beige
Odor:	Characteristic
pH:	5.5 – 6.5
Viscosity with Brookfield SP4 RPM 20	18.000-20.000 mPa·s

## METHOD

Heat phase A at 70-75°C, then repeat for phase B. Add slowly B to A, then mix until the emulsion takes place. Cool down to 50°C and add C, then mix until it forms a homogeneous system
